

Autisme Rwanda Screening Training

Phase 1 guide for parents, teachers, Abajyanama b'Ubuzima and Autisme Rwanda district teams.

Section	Guidance
Purpose	Support early autism screening observations for children aged 3-13 and improve referral/follow-up coordination across districts.
Users	Parents, nursery/primary teachers, community health workers, Autisme Rwanda staff and assigned district representatives.
Workflow	Create a screening report, record child age and location, answer screening questions, submit for review, then track follow-up.
Privacy	Child and guardian details must remain private. Only approved staff should access identifiable records.
District data	Each report should include district, sector, cell, village and school/center when available.

Note: This tool supports screening and referral. It does not replace clinical diagnosis by qualified specialists.
